

## **Mathematics**

As a school we endeavour to ensure all children develop a positive and enthusiastic attitude towards mathematics that will remain with them throughout their lives. We also aim to ensure children enjoy mathematics learning and experience the enjoyment of playing with maths and problem solving.

Mathematics is taught through a stage not age approach with a comprehensive calculations policy that is taught consistently throughout the school. Targets for mental maths are delivered through a whole school mental arithmetic passport system that encourages healthy competition between children while celebrating everyone's success.

We actively encourage links with home by holding workshops that focus on maths and on supporting parents at home with our calculations policy.

At Bordesley Green Primary maths is a fun, enriching and challenging to all!

If you would like any further information regarding the teaching of Mathematics at Bordesley Green Primary School please contact Mrs Davies or Mr Austin.
