

Intent for our Science Curriculum

Science at BGPS is exciting, engaging and active. As one of the core subjects in primary school, it is given the prominence it requires. We aim for it to give all children a strong understanding of the world around them. It allows them to develop skills and understanding to help them think scientifically and to gain an understanding of scientific processes while using specialist vocabulary and developing effective questioning, predicting and problem-solving skills. Within the school environment, Science can be seen and is creating an engaging scientifically stimulating environment for all children and staff.
