

What Parents & Carers Need to Know about

TIKTOK

AGE RESTRICTION
13+

TikTok is a video-sharing social media app which lets people create, view and download looping 15-second clips. Typically, these are videos of users lip-syncing and dancing to popular songs or soundbites (often for comic purposes), enhanced with filters, effects and text. Designed with young people in mind, TikTok skyrocketed in popularity in 2019 and has featured near the top of download charts ever since. It now has around a billion users worldwide.

AGE-INAPPROPRIATE CONTENT

Most videos appearing on a child's feed are light-hearted and amusing. However, some clips have been reported for featuring drug and alcohol abuse, themes of suicide and self-harm, or young teens acting in a sexually suggestive way. The sheer volume of uploads is impossible to moderate entirely – and since TikTok Jump's introduction in mid-2021, users can view third-party content outside the app.

18

CENSORED

EXPLICIT SONGS

TikTok primarily revolves around videos of users lip-syncing and dancing to music. Inevitably, some featured songs will contain explicit or suggestive lyrics. Given the app's young user-base, there is a risk that children may view older users' videos and then be inclined to imitate any explicit language or suggestive actions.

W&#*!

TIKTOK FAME

The app has created its own celebrities: Charli D'Amelio and Lil Nas X, for example, were catapulted to fame by exposure on TikTok – leading to many more teens attempting to go viral and become "TikTok famous". While most aspiring stars hoping to be "the next big thing" will find it difficult, setbacks may in turn prompt them to go to even more drastic lengths to get noticed.

HAZARDOUS VISIBILITY

Connecting with others is simple on TikTok – including commenting on and reacting to users' videos, following their profile and downloading their content. The majority of these interactions are harmless, but – because of its abundance of teen users – TikTok has experienced problems with predators contacting young people.

ADDICTIVE NATURE

Like all social media, TikTok is designed to be addictive. It can be hugely entertaining – but that also makes it hard to put down. As well as the punchy nature of the short video format, the app's ability to keep users intrigued about what's coming next mean it's easy for a 5-minute visit to turn into a 45-minute stay.

IN-APP SPENDING

There's an in-app option to purchase "TikTok coins", which are then converted into digital rewards for sending to content creators that a user likes. Prices range from 99p to an eye-watering £99 bundle. TikTok is also connected with Shopify, which allows users to buy products through the app.

Advice for Parents & Carers

TALK ABOUT ONLINE CONTENT

Assuming your child is above TikTok's age limit, talk to them about what they've viewed on the app. Ask their opinion on what's appropriate and what isn't. Explain why they shouldn't give out personal details or upload videos which reveal information like their school or home address. In the long run, teaching them to think critically about what they see on TikTok could help them to become social-media savvy.

MAINTAIN PRIVACY SETTINGS

The default setting for all under 18s' accounts to 'private'. Keeping it that way is the safest solution: it means only users who your child approves can watch their videos. The 'Stitch' (which lets users splice clips from other people's videos into their own) and 'Duet' (where you build on another user's content by recording your own video alongside their original) features are now only available to over 18s. This might clash with your child's ambitions of social media stardom, but it will fortify their account against predators.

LEARN ABOUT REPORTING AND BLOCKING

With the correct privacy settings applied, TikTok is a relatively safe space. However, in case something does slip through, make sure your child knows how to recognise and report inappropriate content and get them to come to you about anything upsetting that they've seen. TikTok allows users to report anyone breaching its guidelines, while you can also block individual users through their profile.

ENABLE FAMILY PAIRING

'Family Pairing' lets parents and carers link their own TikTok account to their child's. Through your mobile, you can control your child's safety settings remotely – including limiting screen time, managing their ability to exchange messages (and with whom) and blocking a lot of age-inappropriate content. TikTok's Safety Centre also provides resources for parents and carers to support online safety among families. These resources can be found on their website.

USE RESTRICTED MODE

In the app's 'Digital Wellbeing' section, you can filter out inappropriate content (specific content creators or hashtags, for instance) using 'Restricted Mode'. This can then be locked with a PIN. You should note, though, that the algorithm moderating content isn't totally dependable – so it's wise to stay aware of what your child is watching.

MODERATE SCREEN TIME

As entertaining as TikTok is, you can help your child to manage their time on it in the 'Digital Wellbeing' section. Under 'Screen Time Management', you can limit the daily permitted time on the app (in increments ranging from 40 minutes to two hours). This preference can also be locked behind a PIN. That way, your child can get their regular dose of TikTok without wasting the whole day.

What Parents & Carers Need to Know about

SNAPCHAT

AGE RESTRICTION
13+

Snapchat is a photo- and video-sharing app which also allows users to chat with friends via text or audio. Users can share images and videos with specific friends, or through a 'story' (documenting the previous 24 hours) visible to their entire friend list. Snapchat usage rose during the pandemic, with many young people utilising it to connect with their peers. The app continues to develop features to engage an even larger audience and emulate current trends, rivaling platforms such as TikTok and Instagram.

CONNECTING WITH STRANGERS

Even if your child only connects on the app with people they know, they may still receive friend requests from strangers. Snapchat's links with apps such as Wink and Hoop have increased this possibility. Accepting a request means that children are then disclosing personal information through the Story, SnapMap and Spotlight features. This could allow predators to gain their trust for sinister purposes.

EXCESSIVE USE

There are many features that are attractive to users and keep them excited about the app. Snap streaks encourage users to send snaps daily, Spotlight Challenges give users the chance to obtain money and online fame, and the Spotlight feature's scroll of videos makes it easy for children to spend hours watching content.

INAPPROPRIATE CONTENT

Some videos and posts on Snapchat are not suitable for children. The hashtags used to group content are determined by the poster, so an innocent search term could still yield age-inappropriate results. The app's Discover function lets users swipe through snippets of news stories and trending articles that often include adult content. There is currently no way to turn off this feature.

SEXTING

Sexting continues to be a risk associated with Snapchat. The app's 'disappearing messages' feature makes it easy for young people (teens in particular) to share explicit images on impulse. While these pictures do disappear – and the sender is notified if it has been screenshotted first – users have found alternative methods to save images, such as taking pictures with a separate device.

DAMAGE TO CONFIDENCE

Snapchat's filters and lenses are a popular way for users to enhance their 'selfie game'. Although many are designed to entertain or amuse, the 'beautify' filters on photos can set unrealistic body image expectations and create feelings of inadequacy. Comparing themselves unfavourably against other Snapchat users could threaten a child's confidence or sense of self-worth.

VISIBLE LOCATION

My Places lets users check in and search for popular spots nearby – such as restaurants, parks or shopping centres – and recommend them to their friends. The potential issue with a young person consistently checking in locations on Snapchat is that it allows other users in their friends list (even people they have only ever met online) to see where they currently are and where they regularly go.

Advice for Parents & Carers

TURN OFF QUICK ADD

The Quick Add function helps people find each other on the app. This function works based on mutual friends or whether someone's number is in your child's contacts list. Explain to your child that this feature could potentially make their profile visible to strangers. We recommend that your child turns off Quick Add, which can be done in the settings (accessed via the cog icon).

CHAT ABOUT CONTENT

Talk to your child about what is and isn't wise to share on Snapchat (e.g. don't post explicit images or videos, or display identifiable details like their school uniform). Remind them that once something is online, the creator loses control over where it might end up – and who with. Additionally, Snapchat's 'Spotlight' feature has a #challenge like TikTok's: it's vital that your child understands the potentially harmful consequences of taking part in these challenges.

CHOOSE GOOD CONNECTIONS

Snapchat has recently announced that it is rolling out a new safety feature: users will receive notifications reminding them of the importance of maintaining connections with people they actually know well, as opposed to strangers. This 'Friend Check Up' encourages users to delete connections with users they rarely communicate with, to maintain their online safety and privacy.

KEEP ACCOUNTS PRIVATE

Profiles are private by default, but children may make them public to gain more followers. Your child can send Snaps directly to friends, but Stories are visible to everyone they have added, unless they change the settings. If they use SnapMaps, their location is visible unless 'Ghost Mode' is enabled (again via settings). It's prudent to emphasise the importance of not adding people they don't know in real life. This is particularly important with the addition of My Places, which allows other Snapchatters to see the places your child regularly visits and checks in. Additionally, it's important to be cautious about Shared Stories as this allows people who are not on your contact list access to the post.

TALK ABOUT SEXTING

It may feel like an awkward conversation (and one that young people can be reluctant to have) but it is important to talk openly and non-judgementally about sexting. Discuss the legal implications of sending, receiving or sharing explicit images, as well as the possible emotional impact. Emphasise that your child should never feel pressured into sexting – and that if they receive unwanted explicit images, they should tell a trusted adult straight away.

BE READY TO BLOCK AND REPORT

If a stranger does connect with your child on Snapchat and begins to make them feel uncomfortable through bullying, pressure to send explicit images or by sending explicit images to them, your child can select the three dots on that person's profile and choose report or block. There are options to state why they are reporting that user (annoying or malicious messages, spam, or masquerading as someone else, for example).

What Parents & Carers Need to Know about

Favourite Review Share

▶ YOUTUBE ▶

YouTube is a video-sharing social media platform that allows billions of people around the world to watch, share and upload their own videos with a vast range of content – including sport, entertainment, education and lots more. It's a superb space for people to consume content that they're interested in. As a result, this astronomically popular platform has had a huge social impact: influencing online culture on a global scale and creating new celebrities.

INAPPROPRIATE CONTENT

YouTube is free and can be accessed via numerous devices, even without creating a YouTube account. Some content is flagged as 'age-restricted' (requiring the user to be logged into an account with a verified age of 18), but children can still view some mildly inappropriate material. This can include profanity and violence, which some young users may find upsetting.

CONNECT WITH STRANGERS

YouTube is a social media platform which allows people to interact with other (usually unknown) users. Account holders can leave comments on any video they have access to, as well as messaging other users directly. Connecting with strangers online, of course, can potentially lead to children being exposed to adult language, to cyberbullying and even to encountering online predators.

SUGGESTED CONTENT

YouTube recommends videos related to what the user has previously watched on their account, aiming to provide content that will interest them. This is intended to be helpful but can also lead to binge-watching and the risk of screen addiction, especially if 'auto-play' is activated. Users without an account are shown popular videos from the last 24 hours, which might not always be suitable for children.

HIGH VISIBILITY

Content creators can also be put at risk – especially young ones who try to make their online presence as visible as possible. Creating and uploading content exposes children to potential harassment and toxicity from the comments section, along with the possibility of direct messaging from strangers. Videos posted publicly can be watched by anyone in the world.

TRENDS AND CHALLENGES

YouTube is teeming with trends, challenges and memes that are fun to watch and join in with. Children often find these immensely entertaining and might want to try them out. Most challenges tend to be safe, but many others may harm children through either watching or copying. The painful 'salt and ice challenge', which can cause injuries very quickly, is just one of many such examples.

SNEAKY SCAMMERS

Popular YouTube channels regularly have scammers posing as a well-known influencer in the comments section, attempting to lure users into clicking on their phishing links. Scammers impersonate YouTubers by adopting their names and profile images, and sometimes offer cash gifts or 'get rich quick' schemes. Children may not realise that these users are not who they claim to be.

Advice for Parents & Carers

APPLY RESTRICTED MODE

Restricted Mode is an optional setting that prevents YouTube from showing inappropriate content (such as drug and alcohol abuse, graphic violence and sexual situations) to underage viewers. To prevent your child from changing across age-inappropriate content on the platform, we would recommend enabling Restricted Mode on each device that your child uses to access YouTube.

18

CENSORED

TRY GOOGLE FAMILY

Creating a Google Family account allows you to monitor what your child is watching, uploading and sharing with other users. It will also display their recently watched videos, searches and recommended videos. In general, a Google Family account gives you an oversight of how your child is using sites like YouTube and helps you ensure they are only accessing appropriate content.

CHECK PRIVACY SETTINGS

YouTube gives users the option of uploading videos as 'private' or 'unlisted' – so they could be shared exclusively with family and friends, for example. Comments on videos can also be disabled and channels that your child is subscribed to can be hidden. If your child is only uploading videos that are protected as 'private', they are far less likely to receive direct messages from strangers.

CHECK OTHER PLATFORMS

Influential content creators usually have other social media accounts which they encourage their fans to follow. Having an open discussion about this with your child makes it easier to find out how else they might be following a particular creator online. It also opens up avenues for you to check out that creator's other channels to see what type of content your child is being exposed to.

MONITOR ENGAGEMENT

YouTube is the online viewing platform of choice for billions of people, many of them children. Younger children will watch different content to older ones, of course, and react to content differently. You may want to keep an eye on how your child interacts with content on YouTube – and, if applicable, with content creators – to understand the types of videos they are interested in.

LIMIT SPENDING

Although YouTube is free, it does offer some in-app purchases: users can rent and buy TV shows and movies to watch, for example. If you're not comfortable with your child purchasing content online, limit their access to your bank cards and online payment methods. Many parents have discovered to their cost that a child happily devouring a paid-for series quickly leads to an unexpected bill!

What Parents & Carers Need to Know about

INSTAGRAM

AGE RATING
13+

follow
WHAT ARE THE RISKS?

Instagram is one of the most popular social media platforms in the world, with over 1 billion users worldwide. The platform allows users to upload images and videos to their feed, create interactive 'stories', share live videos, exchange private messages or search, explore and follow other accounts they like – whilst at the same time continuously updating and adding new features to meet the needs of its users.

ADDICTION

Many social media platforms are designed in a way to keep us engaged on them for as long as possible. There's a desire to scroll often/more in case we've missed something important or a fear of missing out. Instagram is no different and young people can easily lose track of time by aimlessly scrolling and watching videos posted by friends, acquaintances, influencers or even strangers.

PRODUCT TAGGING

Product tags allow users (particularly influencers who are sponsored to advertise products) to tag a product or business in their post. This tag takes viewers, regardless of age, directly to the product detail page on the shop where the item can be purchased and where children may be encouraged by influencers to purchase products they don't necessarily need.

EXCLUSION AND OSTRACISM

Young people are highly sensitive to ostracism. Feeling excluded can come in many forms such as: not receiving many 'likes', not being tagged, being unfriended, having a photo untagged, or not receiving a comment or reply to a message. Being excluded online hurts just as much as being excluded offline – with children potentially suffering lower moods, lower self-esteem, feeling as if they don't belong or undervalued.

PUBLIC ACCOUNTS

Product tagging on Instagram only works on public accounts. If your child wants to share their clothing style, make-up etc and tag items in a post then they may be tempted to change their settings to public, which can leave their profile visible to strangers.

GOING LIVE

Live streaming on Instagram allows users to connect with friends and followers in real-time and comment on videos during broadcast. Risks increase if the account is public because anyone can watch and comment on their videos, including strangers. However, other risks include acting in ways they wouldn't normally or being exposed to inappropriate content or offensive language.

INFLUENCER CULTURE

Influencers can be paid thousands of pounds to promote a product, service, app and much more on social media – the posts can often be identified because they state they're a 'paid partnership'. Ofcom found that young people often attempt to copy-cat influencer behaviour for their own posts to gain likes, sometimes posting content which may not be age-appropriate.

UNREALISTIC IDEALS

Children compare themselves to what they see online in terms of how they look, dress, their body shape, or the experiences others are having. The constant scrolling and comparison of unrealistic ideals can lead to children feeling insecure about their own appearance, questioning how exciting their own lives are and having a fear of missing out.

Advice for Parents & Carers

HAVE OPEN DIALOGUE

Talk to your child about live videos and the risks involved and how they can do it safely with family and friends. Talk to them about ensuring they have safety settings on so only followers can view them live, and maybe help them prepare what they would say when they do go live.

FAMILIARISE YOURSELF

Instagram is one social media app which has its safety features available to parents in a user-friendly manner. The document provides examples of conversation starters, managing privacy, managing comments, blocking and restricting and can be found on the Instagram website > community > parents.

MANAGE LIKE COUNTS

Due to the impact on mental wellbeing, Instagram has allowed users to change the focus of their experiences online away from how many likes a post has by hiding the like counts. Users can hide like counts on all the posts in their feed as well as hiding the like counts on their own posts. This means others can't see how many likes you get. This can be done by going into settings > notifications > posts > likes > off

REMOVE PAYMENT METHODS

If you're happy for your child to have a card associated with their Instagram account, we suggest adding a PIN which needs to be entered before making a payment. This can be added in the payment settings tab and will also help prevent unauthorised purchases.

FOLLOW INFLUENCERS

Following influencers will allow you to monitor what they're sharing as well as being able to discuss anything which you deem inappropriate. Talk to your child about who they follow and help them develop critical thinking skills about what the influencer is trying to do. For example, are they trying to sell a product by promoting it?

USE MODERATORS

Instagram has launched 'live moderators' on Instagram live where creators can assign a moderator and give them the power to report comments, remove viewers and turn off comments for a viewer. It's recommended to keep devices in common spaces so that you are aware if they do go live or watch live streaming.

BE VIGILANT AND REASSURE

Talk to your child about the use of filters. While they can be fun to use they don't represent the real them. If you find your child continuously using a filter, ask them why and reassure them that they are beautiful without it to build up their feelings of self-worth. Discuss the fact that many images online are filtered and not everyone looks 'picture perfect' in real life, which can also lend itself to discuss what is real and not real online.

BALANCE YOUR TIME

Instagram now has an in-built activity dashboard that allows users to monitor and control how much time they spend on the app. Users can add a 'daily reminder' to set a limit on how much time they want to spend on Instagram, prompting them to consider if it's been too long with a 'take a break' message. There's also the option to mute notifications for a period of time. These features can help you have a conversation with your child about how much time they are spending on the app and to set healthy time limits.
